

RAY ALLEN F³ TACTICAL K9 DEPLOYMENT HEAT ALERT SYSTEM WITH PAGER

THREE SYSTEMS TO CHOOSE FROM!

The most technologically advanced K-9 Deployment and Heat Alert Systems in the world.

These are the only Systems that combine a Remote/Pager, an LCD display and your K-9 Deployment device in one compact hand-held unit. Includes features your job requires as well as unique functions you've always wanted - for example, no external vehicle antenna necessary. Integrate our MD10 F Kennel Fan with the System and control the fan from the Heads Up Display. Sophisticated transceiver technology insures each system has unique signal and maximum range. Designed, developed and manufactured right here in Colorado Springs, Colorado, by Ray Allen - the K-9 experts. We're so confident in the performance of these products that Ray Allen offers a two-year warranty - compare that to the competition!

Components

Heads-Up Display (HUD)

- Continuous real time information readout and programming functionality on a small (4" x 6") dashboard display
- HUD has easy to read LCD display and can be mounted on dashboard or console — articulating mount included
- One-wire connection to Control POD — no bulky wiring harness
- LCD shows real time display of temperature and system status — with backlight
- Control integrated MD 10 F fan speed (Off, Low, Medium or High) with the touch of a button
- System functionality can be programmed quickly and easily
- One-touch system on/off

Interactive Intelligent Remote/Pager

- Small hand-held unit (1.9" x 3.2") that combines LCD display, pager and K-9 Deployment activation
- LCD shows constant real time display of vehicle temperature, system status, signal strength and Remote/Pager battery level — with backlight
- Instant notification of temperature problems
- Mute setting to alert you only via vibrator — eliminates noisy alert in tactical situations
- Recessed buttons to avoid accidental activation
- Heat Alert reset on Remote/Pager to turn off alert allowing you time to return to vehicle
- Constructed of a space-age polymer to insure durability
- Charger and two injection molded form-fitting holsters included (one for your duty rig and one for any other use)
- The Interactive Intelligent Remote/Pager is included with every model

Control POD

- The "brain box" is a small, slim case that can be mounted directly on your Ray Allen Cruise Eze™ Unit or anywhere in your vehicle
- Once installed you never need access to this POD again
- All wiring attaches via positive-lock wire harnesses — no more loose wires
